

**A5**  
**(Landscape)**  
**(CMYK LAYER)**

**Bleed Margin: 214 x 152 mm**

Extend your background to fill the full 'bleed area' – it'll make sure you don't end up with white edges when your item is trimmed.

**Trim: 210 x 148 mm**

This is where we aim to cut your item.

**Safe Area: 206 x 144 mm**

Keep all the important bits of your design – text, logo, icons – inside this area. (Not your background – that still needs to run to the edges of bleed.)

**Do**

- Edit and save your file in **CMYK**. We use ICC profile: **coated FOGRA39**.
- **Outline your text** before saving (select all of the layers, click "type" in the menu, select "create outlines").
- Text and images? Save your file as a **PDF/x-1a**.
- Just a photograph? Save as a high resolution JPEG (only if there's no text at all).
- **Delete the artwork guideline group layer before saving.**

**Don't**

- Flatten your layers or image before saving – it'll reduce your print quality.
- Add additional bleed or print/crop marks to your files – just save your file to the size of this template.
- Save as a multiple page PDF – each design will need to be uploaded individually to **moo.com**

**A5**  
**(Landscape)**  
**(SPECIAL FINISH LAYER)**

**Do**

- Elements being printed in a special finish should be saved in **100% BLACK AND WHITE (C00 M00 Y00 K100)**
- If printing in foil (Gold, Copper, Silver) do not duplicate the design in the CMYK layer
- Edit and save your file in **CMYK**.  
We use ICC profile: **coated GRACoL 2006**.
- **Outline your text** before saving (select all of the layers, click "type" in the menu, select "create outlines").
- **Delete the artwork guideline group layer before saving.**

**Don't**

- Flatten your layers or image before saving – it'll reduce your print quality.
- Add additional bleed or print/crop marks to your files – just save your file to the size of this template.
